SUMMARY

Profound Frontend Developer with 2.5+ years of experience building responsive, high-quality web applications that prioritize user centric. Proficient in React.js, TypeScript, and modern UI/UX principles, with a proven track record of turning complex designs into scalable, reusable components. Skilled at collaborating in Agile environments to deliver innovative solutions.

SKILLS

***TECHNICAL SKILLS*:**

- **Front-End Development**: React.js, UI/UX, HTML, CSS, Typescript, Sass, JavaScript (ES5/ES6+), Angular (familiar), Tailwind CSS
- **Back-End Development**: Node.js, REST APIs, Java/Spring Framework (Intermediate)
- **Database**: **MongoDB**, **Firebase**, SQL Server
- **Testing Tools**: **Jest**, React Testing Library, Selenium, E2E Test Cases, Unit Tests
- **Version Control**: Git (branching, merging, pull requests), Jira for Agile and scrum operations
- **Performance Optimization**: Debugging and turning web applications
- **Familiar OS**: Windows, macOS, Android, iOS and Linux

***SOFT SKILLS*:**

- Problem-solving, Collaboration, Communication, Agile

PROFESSONAL EXPERIENCE

FULL STACK DEVELOPER*| QuickCasa (SaaS) | Kitchener, ON*   *Aug 2023 – Apr 2024*

- **Enhanced user experience** by developing responsive UI components with React.js, resulting in a **25% reduction in page load times**.
- Built a **real estate admin portal** in collaboration with the Chief Product Officer (CPO), utilizing **Figma** for design and **Node.js APIs** for seamless integration, improving property management operations and user efficiency.
- Increased code quality and coverage by implementing robust unit and integration tests with **Jest**, improving application reliability by **30%**.

FULL STACK DEVELOPER*| Northern Devs (SaaS) | Kitchener, ON*   *Jan 2023 – Apr 2024*

- Designed and developed an **e-commerce admin portal** with over **15 reusable TypeScript components**, reducing development time for new features by **50%**.
- Created a dashboard with interactive tools to simplify business analytics and reporting using **React.js** and **Node.js**, reducing manual data processing efforts by **40%**.
- Enhanced platform functionality by integrating **Stripe payment gateway** and detailed order management features, which improved transaction processing speed by **20%**.
- Collaborated with clients to define requirements and used **Webflow** and **Figma** for design, ensuring delivery of a user-friendly interface.
- Conducted front-end unit testing with **Jest**, resulting in a **15% reduction in post-deployment issues**.

PROJECTS

APPLICATION TRACKER*| Demo | Figma*

- Designed **UI/UX frames** with **6 interactive screens/pages** using **Figma**, creating an intuitive and user-friendly interface.
- Developed the application using **React.js** and **TypeScript**, ensuring a dynamic and responsive front-end experience.

- Implemented **CRUD operations** and **search/filter functionalities**, enabling seamless organization and management of job applications.
- Integrated **Firebase** for secure and scalable data storage, providing real-time updates.
- Built **RESTful APIs** with **Node.js**, optimizing communication between the client and server for smooth functionality.

BUSINESS ANALYTICAL DASHBOARD| [Documentation](#) | [Figma](#)

- Led a cross-functional team in developing an analytics dashboard using MERN stack, and project management skills throughout the development lifecycle.
- Recognized as 'Best of Program' for innovative technology use and team performance, demonstrating effective stakeholder management and operational excellence in project delivery.

MARRY ME (E-COMMERCE) (ONGOING) | [GitHub](#)

- Currently developing a scalable full-stack e-commerce website using Next.js and MongoDB.
- Working on a dynamic and user-friendly front end with Next.js for continuous navigation and interactivity.
- Designing secure RESTful APIs using Postman for testing and MongoDB for efficient database management.
- Implementing features including product catalogs, user authentication, shopping cart functionality, and payment integration.

EDUCATION

- Graduate Certificate (Mobile Solutions Development)
- Bachelor of Technology (Computer Science)
